Summary

I am a graduate of Onja, a social enterprise in Madagascar that trains capable, low-income youth into React developers.

I graduated high school scoring in the top 1% of my peers and was accepted into the Onja program from an initial pool of 200,000 students.

I am eager to learn and deeply committed to my craft.

Educational Training

**Web Development
Immersive Program**
Onja Madagascar
FROM JAN. 2019 TO APR 2021

Spent over 4000 hours writing and learning code, covering HTML5, JavaScript, React, Redux, TypeScript and React Native. Completed over 90 web projects. I was taught by instructors with a combined 35 years of experience.

Projects

GoAlert
React, Cypress

I am an active contributor to Target's on-call scheduling software. I help update their class-based React components to functional components, using React Hooks.

**Ethereum Transaction
Tracker**
React, Web3.js

This application displays the list of the ethereum transactions depending on the given wallet address and block. The token balance by the given date and wallet address is retrieved by using Web3.js.

Skills

React
Redux
React Native
Web3.js
Cypress

HTML5
CSS3
SASS
JavaScript
TypeScript
